

Subject Index, Volume 4

- Adaptive hyperfunction 327
- Adenosine 339
- Alpha-Adrenergic receptors 91
- Alpha-1 and -2 Adrenergic receptors 293
- Beta-Adrenergic receptor 143
- Allopurinol 69
- Alveolar capillaries 267
- Aminophylline 231
- Anastomoses 311
- Anesthesia buffers 91
- Angiotensin II 143
- Anionic domains 45
- Antibodies to xanthine oxidase 113
- Arachadonic acid 249,355
- Arterial pO₂ 169
- Arterial venous anastomoses 447
- Arterioles 91
- Asthma 231
- Atherosclerosis 195

- Blood-brain barrier 45
- Blood glucose 293
- Bradykinin 377

- Calcium-entry blockers 91
- Capillary blood flow 447
- Capillary blood cell velocity 447
- Capillary filtration coefficient 143
- Catecholamines 143
- Coronary embolization 311
- Coronary flow 21
- Crystalloids 419
- Cutaneous capillary blood flow 447
- Cyclooxygenase 355

- DDAVP 143
- Diaphragm 399
- Dimethyl sulphoxide 69

- Edema formation 143
- Eicosanoids 91
- 5,8,11,14-Eicosatetraynoic acid 355
- Endothelial cells 91
- Endothelial cell contraction 113
- Endothelial cell stabilizers 143
- Endothelial surface receptors 113
- Endothelial tight junctions 113
- Endothelial ultrastructure 267
- Endothelium 45,267
- Endothelium-derived relaxing factor (EDRF) 21
- Endotoxin 293
- Epinephrine 91
- Extra-alveolar microvessels 267

- Fenestrae in microvessels 113
- FITC-dextran 150 433

- Fluorescence microscopy 69
Free radicals 69
Freeze-fracture studies 113
Functional rarefaction 339
- Gliomas 45
Glomerular basement membrane 327
Glomerulosclerosis 327
Glycogen depletion 293
Glycogen distribution 293
- Hemorrhagic shock 419
Heparin 267
Hepatic glycogen distribution 293
Histamine 231,469
Histamine-ferritin conjugate 469
Histamine-type mediators 143
Hypertension 339
Hypercapnia 205
Hyperglycemia 293
Hyperoxemia 169
Hypertrophy 327
Hypocapnia 205
- Indomethacin 355
Inflammatory mediators 143,231
Interstitial space 433
Intra-aortic balloon tamponade 419
Intrplatelet cyclic AMP 3
Intravital fluorescent microscopy 433
Ionic milieu 91
Ischemia/reperfusion 69
- Lactate 205
Leukocytes 143
Leukotriene 249,355
Leukotriene B₄ 249
Leukotriene C₄ 249,355
Leukotriene D₄ 249,355
Lipoxygenase 355
Liver 293
Lymph flow 231,377
Lymph to plasma total population 143
Lymphatic vessels 249,399
- Macromolecular efflux 267
Macromolecular permeability 69,143
Mast cells 469
Mesenteric microcirculation 339
Microscopic capillaries 311
Microthrombosis 195
Microvascular embolization 311
Microvascular endothelium 113
Microvascular flow regulation 169
Microvascular muscle 91
Microvascular permeability 113,231
Microvascular pressure 143
Microvascular transport of macromolecules 433

- Microvessels 69
Mucosal ischemia 419
Muscle 205
Myoendothelial junctions 113
- Nisoldipine 91
Nitric oxide 21
Norepinephrine 91,249
- One-dimensional transport model 433
Oxygen delivery to tissues 169,205
- Pathology, cold-induced 3
Pericytes 143
Peritonitis 399
Permeability 433
Pharmacology of arterioles versus venules 91
Phosphodiesterase 3
Plasmalemmal vessels 267
Platelet-activating factor 433
Platelet thromboxane A₂ synthesis 3
Postcapillary venules 143
Prazosin 293
Prostacyclin 3
Prostanoid synthesis 3
Protamine sulfate 267
Protein concentration 377
Protein extravasation 231
Protein transport 377
Pulmonary capillary wedge pressure 419
Pulmonary edema 267
Pulmonary microcirculation 267
- Beta₂-Receptor agonist 377
- Sex hormones 91
Skeletal muscle 293
Skin temperature 447
Stereologic procedures 267,327
Superoxide dismutase 69
- Terbutaline 377
Theophylline 231
Thromboxane A₂ 3
Tissue metabolism 91
Tissue oxygenation 169,205
Total occlusion ischemia/reperfusion 69
Tubular necrosis 419
- Vascular permeability 433
Vasoactive agents 143
Vasoactive buffers 91
Vasoconstriction 355
Vasoconstrictors 249
Vasodilators 143
Vasopressin 143
Venular endothelium 113
Vesicular channels 113
Videodensitometry 447
- Xanthines 231
- Yohimbine 293
